Search Notes

Examiner LY:

Attached are the search results for your case. The following database clusters were searched:

- Non-Patent Literature (NPL) abstract files;
- Non-Patent Literature (NPL) fulltext files;
- Patent abstract files;
- Patent fulltext files.

An inventor search was executed and a few supplemental references are with the search results. A table of contents shows the beginning page number of each database cluster and page numbers for possible relevant references are listed.

Concepts searched were: master index; customer id; data storage id; and multiple storage facilities

If you require additional information or a refocus of the search contacted:
